MOHAMED SALLIEU BAH

Istanbul, Türkiye • +90 501 104 70 01 • mohamedsallieubah34@gmail.com • linkedin.com/in/mohamed-sallieu-bah

Education

Ibn Haldun University — Istanbul, Türkiye
Master's Degree in Management. GPA: 3.60/4.00 — Sep 2023 – Present

- Research focus: public attitudes toward renewable energy and risk management in renewable-energy projects.

Fatih Sultan Mehmet Vakif University — Istanbul, Türkiye
B.Sc. Electrical and Electronics Engineering. GPA: 3.19/4.00 — Sep 2019 – Jun 2023

- Graduation project: developed an STM32F103C8T6-based lithium-ion battery monitoring and balancing concept using pack voltage and current measurements.
- Relevant coursework: Off-Grid Solar Energy Systems; EV Battery Management Systems; Advanced Battery Management for EVs; Python Programming; Machine Learning; Basic Entrepreneurship Program.

Experience

VAT ENERJİ — Istanbul, Türkiye
Energy Audit & Project Engineer — Present

- Conduct industrial energy audits and develop energy-efficiency projects across electrical, mechanical, and thermal utility systems.
- Analyze measurements, equipment data, operating profiles, energy baselines, tariffs, investment costs, annual savings, and simple payback periods.
- Prepare engineering calculations, Excel feasibility models, technical reports, and implementation recommendations for clients and stakeholders.
- Develop projects in waste-heat recovery, motor and drive optimization, pump VFD control, solar air preheating, transformer loading, and power quality.
- Modeled ammonia-compressor waste-heat recovery: 220.24 kW recovered load and 1,123.24 MWh/year thermal recovery, yielding 958,110 TL/year net savings and a 3.13-year payback.
- Calculated synchronous-belt conversion savings of 8.734 kW, 61,141 kWh/year and 246,400 TL/year, with a 2.61-year payback.
- Compared valve control with VFD operation for pumps at 100%, 75% and 50% flow using a weighted annual profile and 2% drive losses.

Delsa Information and Defense Technologies
Electronic Circuit Design & Embedded Systems Intern — Mar 2023 – May 2023

- Designed and simulated electronic circuits in Proteus Design Suite, applying circuit-evaluation and component-selection principles.

Zigana Energy / KRK Holding A.Ş.
Electrical Engineer Intern — Jun 2022 – Jul 2022

- Supported operation, monitoring, and maintenance of solar power plants within multidisciplinary project teams.
- Observed plant performance and gained field exposure to preventive maintenance of renewable-energy assets.

M&M Marine Istanbul — Istanbul, Türkiye
Deputy Sales Manager — Jul 2018 – Sep 2018

- Managed client communication and contract discussions, strengthening commercial and stakeholder-management skills.

Leadership & Activities

EHS Hackathon – *First Place, Resilient Electricity System Design* — 2023

Teknofest Chip Design Competition – *Advanced to the third stage* — 2022

Skills & Interests

Technical: Industrial energy audits; heat and power calculations; energy baselines; savings, ROI and payback analysis; waste-heat recovery; solar PV and solar air heating; motors, pumps and VFDs

Software: Microsoft Excel, MATLAB/Simulink, ETAP, Proteus, LTspice, SPSS

Programming: Python, C/C++, C#/.NET; AI-assisted development (Claude, Codex), Supabase

Languages: English, Turkish, Arabic

Interests: Renewable energy, energy efficiency, battery management systems
